Instrument and apparatus trolleys
multi-purpose and transport trolleys
Instrument trolleys are available in height 800, 900 and 1000 mm
They consist of a sturdy chrome nickel steel tubular frame and are mobile on 4 antistatic swivel castors, 75 mm diameter, with bumpers. Two of the castors are fitted with brakes. Removable chrome nickel steel shelves are either inserted or placed on top. Optional extras include a plastic guard and a drawer in closed housing.

Apparatus trolleys, 650 mm high
Guarantee an optimum working height for locating equipment. For the technical specifications, see the instrument trolleys.

Instrument and apparatus trolleys may be provided with twin wheel castors to endure MRI compatibility.
Multi-purpose trolleys, 865 mm high feature a push handle and swivel castors, diameter 125 mm for greater manoeuvrability. In all other respects, the design of these trolleys is identical to that of the “instrument trolleys”.

Transport trolleys, 940 or 1260 mm high, are provided with shelves firmly welded in between two circular tube push handles, featuring a high rim with large radii all around to avoid soiling. Mobile on 4 castors with a diameter of 125 mm. 2 of the castors are fitted with brakes. Plastic bumpers are fitted to prevent damage to the trolley.

Material
All trolleys and tables as well as the chrome-nickel steel accessories are mainly made of high-grade chrome nickel steel sheets and tubing, material AISI 304 (1.4301), surface polished grain 240/320.

For specific-purpose use, we also offer anaesthetic table, sterilization tray trolleys, pallet trolleys, and universal trolleys; they also comply with the DIN standard for packaging of sterile goods.
### Instrument Trolleys and Anaesthetic Table

**Instrument trolleys, 800 mm, 900 mm or 1000 mm high and anaesthetic table**

Complying with DIN standard for packaging of sterile goods. Made of high-grade chrome nickel steel sheets and tubing, material AISI 304 (1.4301), surface polished grain 240/320.

Mobile on 4 antistatic swivel castors, diameter 75 mm, double-row ball bearings, anti-thread mechanism, bumpers, two of the castors provided with brakes.
