Desk work places
in examination rooms

INFORMATION

10-1

E

2015

Desk work places can be free-standing, standing with one side against the wall, or they can be installed as part of a work unit.

Base cabinets and shelves: Powder-coated sheet steel (-B- model series) – select colours from Becker colour list. Base cabinets with base standard height 100 mm.

Wall angles, wall brackets, supporting feet or supporting frames can be used depending on the respective position. Available in powder-coated sheet steel or chrome nickel steel.

Please select the **required desk dimensions** individually from the Becker range of worktops. We recommend a worktop depth starting as of approx. 700 mm. For the cable routing a lead-through socket of 80 mm diam. made of plastic, or, alternatively, made of chrome nickel steel, is available.
